

MAGAZINES

The latest trends, and new technology — instantly

What types of vehicles and technologies are being developed around the world? Where can you read probing interviews with innovative engineers? Could a historical product development assist with a current project?

With a subscription to the entire SAE magazine library, you will always have the most current trends, technologies and interviews – with 50 issues automatically added each year.

Learn about new ideas, cutting-edge and break-through technologies coming to the marketplace, along with interviews from key leaders and developers. Read articles about history-making pioneers and their research – available through our magazine archive – easily and efficiently searchable at your fingertips.

Our extensive library of current and historical articles will **help faculty prepare lectures, curriculum and research papers, and provide librarians with an essential, trusted source of industry information that their constituents can use in their studies, projects and cite in research.**

For over a century, SAE International has been at the forefront of the advancement of automotive, aerospace and commercial vehicles around the world. SAE's magazines chronicle technology, design, research and industry trends.

SAE's industry-leading magazines include:

Automotive Engineering
The industry's premier automotive engineering publication, with up-to-date news on technological innovations, design trends, new products, and business practices in the automotive industry worldwide.

SAE Off-Highway Engineering
The industry leader for technical information in the commercial vehicle field.
Aerospace & Defense Technology
The latest technical information on research and developments in the aerospace and aviation fields.

Automotive Design
SAE's magazine for the European market focuses on the latest design and technical trends for automobiles and their systems.

Mobility Engineering
The joint publication of SAE International and SAEINDIA covers the latest Indian and global automotive, aerospace, and off-highway industry engineering innovations.

See what's next
You spoke. We listened. In the coming months SAE International will reveal an updated Digital Library platform that will enhance user experience, expand content offerings, improve discoverability, and much more. Look for a new name, a new look, and better, faster way to access the content you need. Stay tuned to see what's next.
